Premium Performance System

For cold water use only

Aqua-Pure's DWS 750 Drinking Water System utilizes a multi-composite filtration cartridge which is the most effective filtration media for reducing common but potentially harmful impurities.

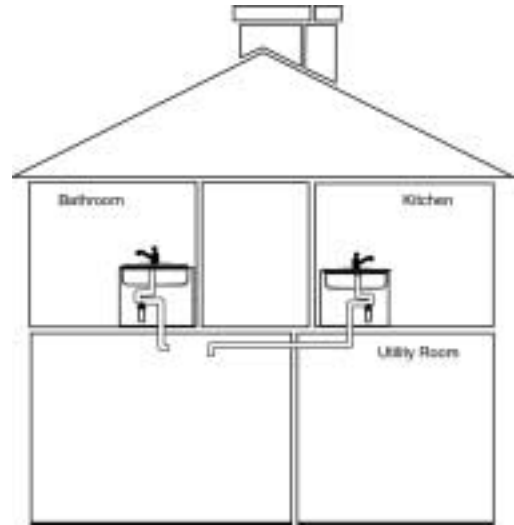

Multi-Composite Media - Magnified 250 Times

During the filtration process, water slowly permeates through a 0.5 micron multi-composite carbon media filter. The intricate carbon matrix provides clean, great tasting water by effectively removing lead, chlorine, cysts, bad taste, and odor.
